E2K GROUP

ABOUT **US**

Our story **began in Milan in the year 2000, with Engineering 2K**, a leading General Contractor in the logistics sector in Italy.

The E2K Group today has **5 headquarters in Europe:** Italy, France, Germany, Romania and Spain.

This project involves more than 200 people. **A highly qualified international team** day after day ensures that each project is carried out in compliance with exceptional professional standards.

OUR **HISTORY**

The FBH group has been active **on the logistics market since the end of the sixties**, and in the last 50 years we have been key players in the evolution of this sector. We have always pursued a mission of **competitiveness and profitability over time**, and for this reason we have constantly evolved our business.

Putting ourself at the service of supply chain management for our group has meant not only designing and managing intra-company logistic activities but also making “structural” **opportunites available to our customers, to faciltate effective production and distribution at the right time**, and constant cost reductions with guarantees on the level of service.

GRUPPO FBH

INNOVATION PROVIDER

GROUP **DEVELOPMENT**

Our story began in Italy to respond to the high demand for modern, efficient and state-of-the-art logistics facilities.

The extensive experience in turnkey construction acquired by Enginnering2K has allowed it to **expand on an international level** (Italy, France, Germany, Romania, Spain and Portugal).

ITALY	FRANCE	ROMANIA	GERMANY	SPAIN	ITALY/FRANCE
Engineering 2K S.p.A.	ING2K	E2K ROMANIA	E2K GERMANY	E2K IBERIA	E2K DATA CENTERS

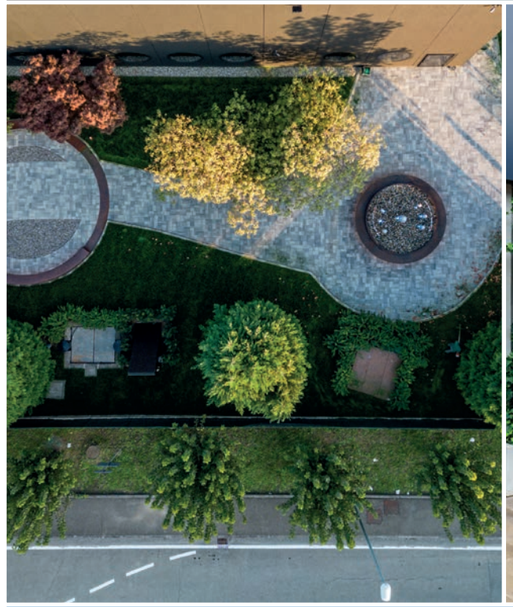

The Group is divided into **independent national companies** to offer the best support in accordance with local regulations and technical characteristics while guaranteeing a close and high-quality partnership. **E2K has expanded mainly in Italy** with the acquisition of new companies.

F&R Facility & Renovation operates as a Global Service for property renovation, adaptation and expansion and to ensure optimal building maintenance.

Beelog provides operational solutions and site management for one or more phases: logistics and shipping, furniture production and fitting as well as turnkey renovations.

E2K Data Centers specializes in the design and construction of data centers, delivering reliable, secure, and high-performance infrastructures from concept to completion.

OUR VALUES

SUSTAINABILITY

E2K group is committed to sustainable construction. The objective of our group strategy is to analyze the main variables that can be used in the design phase of smart buildings, to improve the sustainability of warehouses and logistics facilities.
This commitment is reflected in **improvements to the energy performance of our buildings**, the search for more responsible alternative materials, **improvements to the quality of life at work for operators and their employees**, enhancements to green spaces and the use of renewable energy. As a result we help our customers obtain environmental certifications.

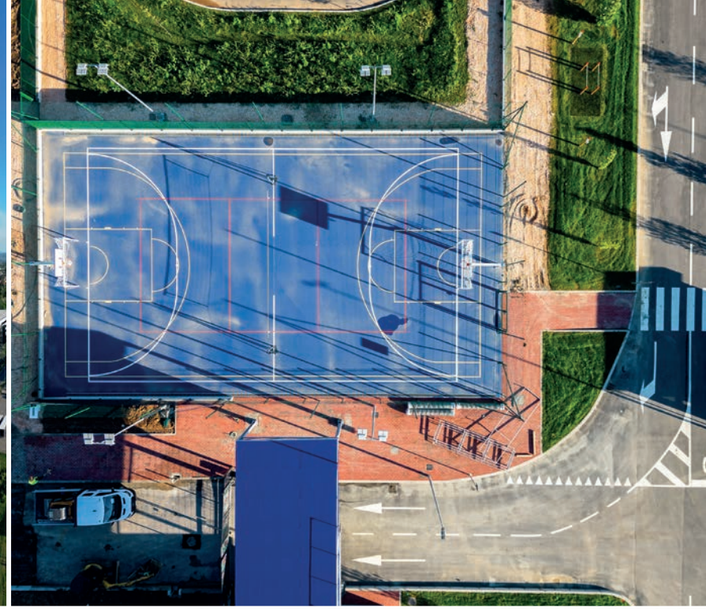

QUALITY, HEALTH & SAFETY

We are committed to providing the Highest Level of Prevention and Protection: the Objective is 0 accidents, to implement best practices, a dedicated team of HSE managers and supervisors, weekly analysis & external auditing and regular reporting.
Quality procedures are essential to track operations and identify critical areas. European Quality Standards increase year after year and the **E2K Group implements Quality Procedures to comply with the latest requirements**.

ISO 9001:2015 / 10005:2019 / 14001:2015

ISO 26000:2010 / 37001:2016 / 45001:2018

OUR **SERVICES**

GENERAL CONTRACTING & TURN-KEY PROJECTS

As a general contractor **we coordinate all aspects of construction projects**, ensuring that tasks are completed on time, within budget, and to specified standards.
We also provide infrastructure works coordination.

CONSTRUCTION DESIGN & FEASIBILITY STUDIES

Our project management service includes comprehensive design capabilities, covering **development plans, feasibility studies and layout designs** (BIM).

PLANNING AND ADMINISTRATIVE AUTHORISATION SERVICES

We also provide **technical and administrative support**, including liaison with public administration, handling building permits and fire brigade compliance.

REFURBISHMENT & RENOVATION

Our renovation service encompasses planning and executing **partial or complete restructuring** projects. Our services include: revamping, relamping and repowering.

POST CONSTRUCTION SERVICES & FACILITY MANAGEMENT

Our facility management service includes routine scheduled maintenance and special repairs. We offer comprehensive **global services** (detailed cost assessments, coordinating safety protocols).

OUR **EXPERTISE**

E-COMMERCE

MAIN CUSTOMERS

INDITEX zalando YOOX GROUP amazon

Since the start of e-commerce in Italy, the E2K Group has collaborated with the main market players, developing automated warehouses to meet the rising demand for different logisitcs functions, resulting in various types of buildings, including **mega e-fulfillment centers**, parcel sorting centers and last-mile parcel delivery centers.

COLD CHAIN

MAIN CUSTOMERS

NEWCOLD METRO Lidl naturasì

E2K has been working with major players in the European food industry (fresh products, poultry, processed products, frozen products), **building tailor-made warehouse and distribution plants** to meet customer specifications and HACCP requirements, while boosting their business and operations.

GLOBAL COLD CHAIN ALLIANCE®

CROSS DOCKING

MAIN CUSTOMERS

One Express PALLEX ITALIA DB SCHENKER Posteitaliane

From a construction point of view the E2K Group over time has developed different shaped Cross Docking buildings to fulfill different customer needs (**L Shape, T Shape, H shape**); **E2K** developed specific know-how to build **column-free** platforms and warehouses to enhance indoor movement efficiency (DB Shenker).

INDUSTRIAL BUILDINGS & DATA CENTER

MAIN CUSTOMERS

PRADA THERMCROSS Plastipak

E2K also deals with **data centers** as well as traditional industrial buildings. These types of buildings meet the operational needs of companies and **reflect a commitment to innovation** and sustainability. Buildings are designed with optimized layouts to maximize the efficiency of production processes and critical infrastructure, while promoting accessibility and integrating cutting-edge technological systems.

iDA ITALIAN DATACENTER ASSOCIATION

OFFICES

MAIN CUSTOMERS

Renault Group adidas SILEIA

The construction of commercial buildings has always been a part of E2K's business and is a process that combines **functionality** and **aesthetics** to create spaces for office and manufacturing projects. Interiors are designed with flexible and optimized layouts allowing spaces to be adapted to different needs, while ensuring energy efficiency, **safety** and **comfort**.

REQUALIFICATION

MAIN CUSTOMERS

MISCUSI HOLYART ROMAEST

Renovation is the new challenge for E2K. **Revamping**, **relamping**, and **repowering** projects make it possible to update and improve exisiting structures to make them more efficient while reducing energy consumption and improving safety. The focus of this service is to reduce the environmental impact of construction sites by **restoring disused buildings**, reduce waste volumes and favo eco-friendly materials.

Data Center Edge

Datacenter B, part of the Aruba Hyper Cloud Data Center campus in Rome

GREEN AREAS AND LANDSCAPE	
GLA	16.080 sqm
Nominal IT capacity	6 MW
Required Certification	ANSI/TIA-942-C (Rating 4)

The project concerns the completion of **Datacenter B**, part of the **Aruba Hyper Cloud Data Center campus in Rome**.

The scope includes the execution of internal architectural works, the installation of mechanical and special systems, along with roof waterproofing and the integration of rooftop technological equipment.

Datacenter B is one of five dedicated data center buildings, each designed with six independent data halls of 1 MW IT power, ensuring modularity, redundancy and scalability within a resilient and energy-sustainable infrastructure.
